---

## Summary

---

Software Developer focused on creating efficient, scalable, and maintainable software solutions. Skilled in multiple programming languages and development tools, with a strong foundation in software engineering principles and methodologies. Proficient in full-stack development, database management, and cloud technologies. Committed to continuous learning and staying updated with emerging technologies to innovate and solve complex technical challenges effectively.

## Experience

---

### Crystal Consulting

#### Full Stack Developer | 02/2025 - Present

Developed a payroll management server using Node.js and React, implemented secure RESTful APIs, integrated authentication middleware, and optimized backend and frontend performance.

#### Media picks (graduation project)

movie recommendation web application aimed at enhancing user experience by providing personalized movie suggestions based on user preferences and viewing history, using HTML, CSS, JavaScript, Node.js, Express

#### Library Management System API

backend service designed to manage library operations efficiently. Built using Spring Boot and MySQL, this API handles various functionalities such as book cataloging, patron management, and transaction processing, ensuring a seamless experience for both library staff and patrons

#### Movie stream website

A simple and intuitive movie streaming website using JavaScript, HTML, and CSS. The website allows users to browse and stream a selection of movies with an easy-to-use interface.

#### Games Rating

Python-based application to predict the ratings of video games using machine learning algorithms. The project involved data collection, preprocessing, model training, and.

## Skills

---
