PROJECTS

AIFitnessTrainer [🔗](#)
Graduation Project | Our objective is to create an AI-based mobile application that offers personalized insightful advice and assistance for trainees by utilizing the capabilities of computer vision and AI techniques to guide users through physical fitness routines.

OnlineShopping [🔗](#)
The Second-hand Goods Buying and Selling Platform is a web application that facilitates the buying and selling of used or pre-owned goods. The platform provides a marketplace where users can list their items for sale, browse listings from other users, and connect with potential buyers or sellers.

Space2Stay [🔗](#)
Space2Stay is a platform that connects travelers with property owners. Users can easily reserve properties for their stay, while hosts can list and manage their properties for bookings. Whether you're looking for a place to stay or want to earn by hosting, Space2Stay simplifies the process, creating a seamless experience for both guests and hosts.

Used Market
Used Market is an eCommerce platform designed to connect buyers and sellers seamlessly. Built with a robust API and an integrated frontend interface, it ensures smooth communication between users and the backend system. The platform simplifies the buying and selling of second-hand goods, offering a user-friendly experience for managing listings and transactions.

- **API** [🔗](#)
- **Website Code** [🔗](#)

Ebuy [🔗](#)
Ecommerce mobile application using android studio

Election-Mangement-System [🔗](#)
The Election Management System can help those who want to nominate himself in elections or vote for specific candidate in a simplified way.

JetMark [🔗](#)

Hotel room reservation [🔗](#)

Events-Scheduler [🔗](#)
This is an application to schedule the events for the user. The application refuse to add an event that intersects with another event. The user can display his events sorted by start date.
